## VACANCY API OPERATOR

### Job Brief

We are looking for a responsible, focused and honest individual to perform synthetic chemistry with patience in a disciplined manner.

If you are passionate about organic chemistry, give us a chance to meet you. We expect you to have had exposure to a laboratory environment excluding undergraduate practical. We want to see a committed and approachable individual and be impressed with your character and skills.

The goal will be to provide quality Active Pharmaceutical Ingredients in a Good Manufacturing Practice environment.

### Responsibilities

- Synthesis of API narcotic tranquiliser molecules
- Carry out organic synthetic production of API under supervision
- GMP documentation compilation
- Preparation for synthetic production, including room clearance and cleaning of equipment
- Initiation, monitoring and completion of chemical reactions
- Work-up, isolation and purification of final API product
- General lab responsibilities

### Requirements

- BSc Chemistry (honours) with one year lab experience, or
- MSc Chemistry with no work experience required (but will be an advantage), or
- National Diploma in Chemistry with 2-5 years lab/work experience
- Preference towards organic chemistry

Apply to [lizette@koeger.co.za](mailto:lizette@koeger.co.za) with your CV and supporting documentation, before or on Friday 17 February 2017.
