

The 13th International Conference on Advanced Polymers via Macromolecular Engineering

15 - 18 April 2019

Wallenberg Research Centre @ STIAS
Stellenbosch, South Africa

Invitation to attend APME 2019

[APME 2019 Website](#)

The 13th International Conference on "Advanced Polymers via Macromolecular Engineering" (APME 2019) will be held in the beautiful historic town, Stellenbosch in South Africa from 15 - 18 April 2019. Stellenbosch is quite easy to reach from Cape Town International Airport (30 min) drive.

The focus of the APME 2019 meeting will be on macromolecular engineering for the design on advanced polymeric structures, in connection to their characterisation and recent applications.

The scope of the meeting will include topics such as (not limited):

- Recent advances in macromolecular synthesis
- Complex macromolecular structures
- Dynamic and supramolecular polymers
- Stimuli-responsive and functional polymer architectures
- Self-healing and reprocessable polymer systems
- Polymers at surfaces and interfaces
- New industrial developments for polymeric materials
- Polymers meet biology/biochemistry
- Polymers from renewable resources
- Polymers for energy applications

[Registration Online - NOW OPEN](#)

[Call for Papers - NOW OPEN](#)

Abstracts are welcome - you can participate in the technical programme by presenting an **Oral and/or Poster Presentation**.

[Key Dates](#)

Abstract submission for oral: 30 June 2018
Abstract submission for poster: 30 November 2018
Early-bird registration: before 31 October 2018

[Accommodation](#)

[Speakers](#)

[Sponsoring / Exhibitors](#)

Sponsoring the APME 2019 Conference is an excellent opportunity to meet and network with the most relevant players in the macromolecular engineering field and will include exposure at all the pre-event and on-site communications and marketing activities.
